

Hypertension

An Official Journal of the American Heart Association

Hypertension is a forum for the presentation of scientific investigation of the highest quality in the broad field of cardiovascular regulation as it may affect high blood pressure research. The editors are interested in receiving original articles that deal with either basic or clinical research in the fields of biochemistry, cellular and molecular biology, immunology, physiology, pharmacology, and epidemiology. In addition, an important part of the journal is reserved for articles on clinical investigation that yield insight into the mechanisms of blood pressure regulation.
