Hypertension

Lewis K. Dahl Memorial Lecture

The Renin System and Four Lines of Hypertension Research: Nephron Heterogeneity, the Calcium Connection, the Prorenin Vasodilator Limb, and Plasma Renin and Heart Attack

John H. Laragh .......................................................... 267

Original Contributions

Adrenal and Circulating Renin-Angiotensin System in Stroke-Prone Hypertensive Rats
Shokei Kim, Masatoshi Tokuyama, Masayuki Hoso, and Kenjiro Yamamoto .................. 280

Endothelin-1 Augments Pressor Response to Angiotensin II Infusion in Rats
Kazunori Yoshida, Minoru Yasujima, Masahiro Kohzuki, Masayuki Kanazawa, Koaru Yoshinaga, and Keishi Abe ............................... 292

Chronic Inhibition of Nitric Oxide Synthesis: A New Model of Arterial Hypertension
Miriam Oliveira Ribeiro, Edison Antunes, Gilberto de Nucci, Silvana Maria Lovisolo, and Roberto Zatz ................................. 298

Enhanced Release of Endothelium-Derived Relaxing Factor in Mineralocorticoid Hypertension
Charles S Bockman, William B. Jeffries, William A. Penninger, and Peter W. Abel ........ 304

Effect of Home Blood Pressure and Gender on Estimates of the Familial Aggregation of Blood Pressure: The Tecumseh Blood Pressure Study
Kenneth A. Jamerson, Nicholas Schork, and Stevo Julius .............................................. 314

Hematocrit, Blood Pressure, and Hypertension: The Gubbio Population Study
Massimo Cirillo, Martino Laurenzi, Maurizio Trevisan, and Jeremiah Stamler for the Gubbio Study Research Group ......................................................... 319

Ethnicity, Pressor Reactivity, and Children's Blood Pressure: Five Years of Observations
Joseph K. Murphy, Bruce S. Alpert, and Sammie S. Walker ........................................ 327

Prognostic Significance of Exercise Blood Pressure and Heart Rate in Middle-aged Men
Jan Filipovsky, Pierre Ducimetiere, and Michel E. Safar ............................................... 333

Brain Atrophy in Hypertension: A Volumetric Magnetic Resonance Imaging Study
Judith A. Salerno, Declan G.M. Murphy, Barry Horwitz, Charles DeCarli, James V. Hasty, Stanley I. Rapoport, and Mark B. Schapiro ............................................ 340

Resting and Maximal Forearm Skin Blood Flows are Reduced in Hypertension
Peter A. Carberry, Alexander M.M. Shepherd, and John M. Johnson ............................. 349

Detection of Glycyrrhetinic Acid-like Factors (GALFs) in Human Urine
David J. Morris, Wasswa E.B. Semafuko, Syed A. Latif, Benjamin Vogel, Craig A. Grimes, and Michael F. Sheff ................................................................. 356

Modulation of Norepinephrine Release by Galanin in Rat Medulla Oblongata
Kazushi Tsuda, Seiko Tsuda, Ichiro Nishio, Yoshiaki Masuyama, and Menek Goldstein ...... 361

Neurotransmission Through Sympathetic Ganglia of Spontaneously Hypertensive Rats
Jeffery C. Magee and Geoffrey G. Schofield .............................................................. 367

Atrial Natriuretic Peptide Modulates Baroreceptor Reflex in Spontaneously Hypertensive Rat
Hongkui Jin, Ren-Hui Yang, David A. Calhoun, James Michael Wyss, and Suzanne Oparil ................................................................. 374

Calcium Channel Activation in Arterioles From Genetically Hypertensive Rats
Deborah S. Storm, Edward L. Stuenkel, and R. Clinton Webb ........................................ 380
