The article entitled “Inverse Relationship Between Fenfluramine-Induced Prolactin Release and Blood Pressure in Humans” by M.F. Muldoon et al (Hypertension. 1998;32:972–975) inadvertently contained an error. In reexamining the data, the authors discovered an error in the comparisons of correlation coefficients. The values of the reported correlations are correct (Table 1), but the differences in these coefficients were incorrectly reported to be statistically significant. Thus, the last sentence of the second paragraph of the Results section should read: “The difference in correlations between blacks and whites was not statistically significant for either systolic or diastolic BP.”
