Correction to: Building on a Legacy of Hypertension Research: Charting Our Future Together

In the article by Mensah et al, “Building on a Legacy of Hypertension Research: Charting Our Future Together,” which published online on November 14, 2016, and appeared in the January 2017 issue of the journal (Hypertension. 2017;69:5–10. DOI: 10.1161/HYPERTENSIONAHA.116.06582), a correction is needed.

On p 7, Clinical Trials, right column, “120 to 140 mm Hg” in the sentence “In addition to challenging the widely accepted blood pressure treatment targets, this study should also inspire the scientific community to identify the molecular mechanisms that may be responsible for the significant cardiovascular health benefits and secondary effects of a lowered blood pressure goal from 120 to 140 mm Hg.” has been changed to read, “In addition to challenging the widely accepted blood pressure treatment targets, this study should also inspire the scientific community to identify the molecular mechanisms that may be responsible for the significant cardiovascular health benefits and secondary effects of a lowered blood pressure goal from 140 to 120 mm Hg.”

The authors apologize for this error.

This correction has been made to the current online version of the article, which is available at http://hyper.ahajournals.org/content/69/1/5.
