In the article “Microarray Analysis of Rat Chromosome 2 Congenic Strains” (McBride et al, *Hypertension*. 41[part 2]:847–853), the authors reported the differential expression of rat *Gstm2* (accession numbers X04229, J02810, and H32189) in their congenic strain. However, in the recent release of the rat annotation, the gene designation of these accession numbers has been changed to *Gstm1*.
Change in Gene Designation
